EDUCATION

The University of Edinburgh

Edinburgh, United Kingdom

Master of Arts in Cognitive Science (Bachelor Degree)

2020.9 – 2024.5

- GPA: 4.0

Fudan University

China

Exchange

2022.9 - 2023.5

Neuromatch Academy

Computational Neuroscience Summer school

2021.6 – 2021.7

- Tutorial and project completion

Encode

Solidity BootCamp

2022.3-2022.5

WORKING EXPERIENCES

Easy group, Lumist

Overseas market operation intern, *Department of Campus Business development*

2020/10/22–2021/4/22

- Led team to develop the market of online education targeted at students at The University of Edinburgh
- Deeply search information about the accommodation, the history and the courses of the university and creates a white book for students to know in advance about the courses and lecturers, which results in a growth of the number of students who are interested in the product of Easy group
- Most efficient intern nominated by the director of the department

Baidu, Paddlepaddle

Paddlepaddle Developer Group Leader

2021/7/23– Present

The Paddlepaddle developer group is a community established by Baidu Paddlepaddle for all deep learning enthusiasts. The group is for developers in artificial intelligence, deep learning and other domains. It offers local technology salons, meetups, courses, and so on.

- Arrange freshmen week and opening season activities
- Lead the league members to participate in various camps for AI education.

RLChina

Linkman of RLCN study group

2021/8/10- Present

RLChina is committed to building a non-governmental communication platform in the field of decision intelligence,

connecting the academia, industry and enthusiasts of decision intelligence.

- Explain the rules of RLChina activities, organize and participate in activities in the campus study group
- Collect feedback on the learning situation of the campus study group, and make suggestions on the improvement of the form of activities
- Maintain information about the campus study group and promote group activity

HashPunk

Project & Product Manager Intern & Quant Intern

2021/9/13 – Present

HashPunk is a startup in blockchain technology found by the previous product director of Conflux Network to deploy applications on multiple public chains such as Ethereum and Conflux.

- Research about projects and output reports
- Manage the requirements and projects
- Make prototype according to requirements
- Manage the quantitative trading system

1CIRCLE, ALGO

Smart Contract developer

2022/1 – 2022/3

1CIRCLE is the official Chinese community for algorand blockchain.

- Badge system contracts development.
- TigerChi NFT rarity algorithm development.

EXTRA-CURRICULUM ACTIVITIES AND AWARDS

University of Edinburgh LambdaSoc Society

Founder, Chairman

2021/5

– Present

- Organize weekly sharing sessions.
- lead and arrange members for AI and blockchain competitions.
- Hold various activities such as coding sessions, study groups etc.

Baidu AI studio

- First place of Paddlepaddle Regular Season: MarTech Challenge Click anti-fraud prediction contest 2021/4
- National AI knowledge contest (Top 10%) 2021/10

Conflux Network

- 2021 Conflux Practitioner program Practitioner medal 2021/6
- 2021 Unihack Conflux Enterprise Award 2021/8
- The third prize of 2021 Conflux Beidou University Student Entrepreneurship Camp 2021/8

Huawei

- 2021 Huawei College Blockchain Competition Distinction Award 2021/7
- The winning prize of 2021 Huawei Cloud Cup National AI contest 2021/9

Deloitte

- Top 10 in 2021 Deloitte Digital Difference Camp (NLP track) 2021/7

Reach Platform

- Championship of 2021 Reach on Conflux Bounty Hack 2021/9
- Winter Camp mentor 2022/1

Others

- Yangtze River Delta Data Open Innovation Application Competition Financial Security Track - Third prize
2022/4
- MoleHack: NFT2.0 Bronze Mole prize (3rd prize)
2022/4
- MoleHack: NFT2.0 Early Promising Mole prize
2022/4

PROJECTS

Deep learning implements dialogue summaries of multiple rounds of dialogues (2021.5-2021.7)

1. Train word vectors, and build the model based on Seq2Seq architecture
2. Improve the model for OOV and word-repetition issues
3. Fine-tune BERT for Extractive Summarization

Topic Modeling Using Latent Dirichlet Allocation (2021.4)

1. Use regular expressions to process textual data and count information such as word frequency
2. Unsupervised machine learning was used to categorize the text topics of political leaders on Twitter

High precision commodity segmentation in white background (uneven lamination)(2021.12)

1. Use Labelme to annotate the data set
2. Use Baidu's PaddleSeg image segmentation model to detect the commodity.

A horoscope application that calls out to a third-party oracle (DAPP) (2021.7-2021.8)

1. Use reach to establish the contracts
2. Use React to establish the frontend

A disaster contain application that could raise fund for refugees (DAPP) (2021.8)

1. Use Baidu map API to collect the information of refugees
2. Use Reach to build a crowdfunding DAPP

RESEARCH EXPERIENCE

Multi-modal learning and generating, supervised by Guosheng Hu (AnyVision) (2021.5-2021-7)

1. Research multi-modal models such as CLIP.
2. Research multi-modal dataset and metrics.
3. Propose applications of multi-modal such as layout generating.

INTERESTS & SKILLS

- Mandarin (Native), English (Fluent)
- MS Word/Excel/PowerPoint (Familiar)
- Python, Java, Reach, Solidity (Familiar)
- Haskell, JavaScript, Go, Matlab, CSS, HTML, R (Basic)
- Pytorch, Tensorflow, Paddlepaddle, cctx (Familiar)
- Axure, Modao (Familiar)
- Interested in machine learning, particularly in natural language processing/reasoning and multi-model learning
- Interested in building web3 applications.
- Interested in AI-driven Fundamental Analysis and quantitative trading.
