SUMMARY

Full Stack Engineer and Developer Relations professional with extensive experience in Web3, blockchain, and AI. Currently leading ecosystem growth at Delphinus Lab (backed by OKX Ventures, Binance Labs). Proficient in Rust, React, React Native, Node.js, TypeScript, and Python. Co-founded a Web3 startup backed by Amber Group. 27+ hackathon wins. Bilingual: Chinese (Native), English (Professional).

TECHNICAL SKILLS

Languages: Rust, JavaScript, TypeScript, Python, Java, Go, Solidity, HTML/CSS, R, Haskell
Frontend: React.js, React Native, Next.js, Tailwind CSS, Redux
Backend: Node.js, Express.js, SpringBoot, RESTful APIs, GraphQL
Database: MongoDB, PostgreSQL, MySQL, Redis
Cloud/DevOps: AWS, Git, Docker, CI/CD, Linux
Blockchain: Solidity, Web3.js, Ethers.js, zkWASM, Smart Contracts, DeFi, NFT
AI/ML: PyTorch, TensorFlow, PaddlePaddle

EDUCATION

The Hong Kong University of Science and Technology Sep 2024 – Jan 2026
Master of Philosophy (MPhil) in Data Science and Analytics Hong Kong / Guangzhou Campus
The University of Edinburgh Sep 2020 – Jun 2024
Master of Arts in Cognitive Science (Undergraduate Degree) – First Class Honors Edinburgh, UK
Coursework: Advanced Web Technology, Software Engineering, Data Analysis, Information Systems Security
Fudan University Sep 2022 – Jun 2023
Exchange Program – Computer Science and Technology Shanghai, China

RESEARCH

Sovereign RAG: Locality-Aware Local-First Retrieval over Decentralized Social Networks 2024 – 2026
MPhil Thesis – HKUST

- Designed local-first RAG framework exploiting instance/community locality for million-scale social retrieval
- Implemented GMP (Generative Metapath Planning) query compiler and TAQ (Topology-Aware Quantization) indexing
- Achieved 79.3% accuracy at zero API cost with sub-100ms latency on 1.36M Mastodon posts (Python, PyTorch, Neo4j)

Enhancing Economic Security in DeFi Apps through Token Customized Behaviors Analysis 2023 – 2024
Undergraduate Thesis – University of Edinburgh

- Developed automated security analysis pipeline for DeFi smart contracts using Certora Prover
- Built data extraction and analysis tools for blockchain transaction patterns (Python, Web3.js)
- Created formal verification specifications for detecting economic vulnerabilities in token behaviors

PROFESSIONAL EXPERIENCE

Delphinus Lab (Backed by OKX Ventures, Binance Labs, Mirana Ventures) Nov 2024 – Present
Ecosystem Director / Developer Relations Engineer Remote

- Promoted to Ecosystem Director (Jun 2025); leading ecosystem growth and developer community
- Maintaining 8+ ecosystem projects; independently developed multiple projects (Staking, Solar, Prediction Market, etc.)
- Built full-stack token airdrop system with Merkle tree smart contracts; developed Launchpad with off-chain ZK proofs triggering on-chain token launch and liquidity management
- Built developer tooling: project scaffolding framework, CLI tools, debugging utilities, and SDK upgrades
- Built fully automated CI/CD containerized deployment platform with Kubernetes
- Building developer relations, technical documentation, and SDK integrations for zkWASM technology

2PM.Network (Backed by Amber Group) May 2024 – Oct 2024
Co-Founder & CEO Remote

- Co-founded privacy AI startup (ZK/FHE Data & AI Infrastructure); led product strategy and team management
- Developed frontend components; led investor pitches and deck preparation

Rosen (Backed by PayPal and Circle) Aug 2022 – Aug 2023
Founding Engineer & Full Stack Developer Remote

- Developed cross-platform apps using React Native and React.js for iOS, Android, and Web
- Integrated multi-chain wallet connections (Solana, BSC) and blockchain service APIs
- Collaborated on smart contract development; presented at DoraHacks and Encode Hackathon

1CIRCLE (Backed by Algorand Foundation) Dec 2021 – Dec 2022
Full Stack Engineer in Blockchain Remote

- Built POAP-like badge application using Reach and React for NFT minting
- Implemented dynamic NFT systems using ARC-19/ARC-69 standards

HashPunk (Invested by KuCoin Ventures, K300, Chain Capital) Sep 2021 – Aug 2022

Project & Product Manager

Remote

- Led GameFi product development; secured \$1,000,000 USD investment from top-tier crypto VCs

Conflux Network

Jul 2021 – Sep 2021

Project Engineering Intern

Remote

Baidu, Inc.

Jul 2021 – Jun 2022

PaddlePaddle Developer Group Leader

Edinburgh, UK

LEADERSHIP

The University of Edinburgh LambdaSoc Society (Backed by Baidu PaddlePaddle University Community) May 2021 – May 2022

Founder / PaddlePaddle Developer Group Leader

- Organized weekly technical sharing sessions, coding sessions, study groups, and developer onboarding activities
- Led members in AI and blockchain competitions; coordinated training, team formation, and project delivery

Lambda Web3 Community

Apr 2022 – May 2023

Founder

- Built a 1000+ member Web3 developer community and grew 5000+ followers across Xiaohongshu, Zhihu, and Twitter
- Led community projects including whitepaper writing, DAO research, and DAO-building initiatives
- Developed partnerships with Encode Club, Algorand student communities, and ecosystem partners

Fudan University Blockchain Association

Mar 2023 – May 2024

Hackathon Lead

- Founded “Martech3” and led the team at ETH Beijing and ForesightX Hacker House
- Developed the “DanMao” NFT project with the development team; coordinated hackathon ideation, product, and engineering

Personal Hackathon & Developer Content Channel

6000+ followers

Creator, Xiaohongshu

- Publish hackathon, Web3 development, and developer community content for aspiring builders

AWARDS (27+ HACKATHON WINS)

2026:

- AVE CLAW HACKATHON 2026 – Champion
- HashKey Chain Horizon Hackathon – 2nd Place in the DeFi Track

2024-2025:

- Zama Bounty Program – Bounty Track Winner (Universal FHEVM SDK)
- ETH Shanghai Bethink Hackathon – Championship & 1st Place (Defending the System Track)
- ETH Beijing – Scroll Track 1st Place & Public Goods Track 2nd Place
- BeWater AI Crypto Hackathon – Security and Privacy Track 1st Prize
- Shenzhen International FinTechathon – 2nd Place (Blockchain Track)
- MEME.ZKWASM() Hackathon – 2nd Place (Game Track, Solo)
- Near [REDACTED] Hackathon – ZettaBlock AI/Web3 Bounty (Solo)
- Amber.ac BUIDL_QUESTS Hackathon – Finalist (Top 5)
- OnePiece Labs X 0G X CAMP Hackathon – AI & Web3 Track 4th Place
- Decentralized AI Buildthon – Finalist Prize (Top 5) with zkPass Bounty

2023:

- Cosmos Chinese Developer Training Hackathon – 1st Place
- DAO-Fi Fusion Challenge – 2nd Place, Best Technical Implementation & Community Award (Solo)
- EduDAO Student Hackathon Mantle Track – Best NFT/Gaming Project (Solo)

2022:

- Algorand Green House Hack – 3x Championship (Smart Contract, NFT Marketplace, SoulBound NFT, Solo)
- OpenMPC Privacy Computing Competition – Winning Prize
- LianFang Cup Blockchain Competition – 3rd Prize
- YRDA Data Open Innovation Competition (Financial Security) – 2nd Prize
- MoleHack: NFT2.0 – Early Promising Mole & Bronze Mole Prize

2021:

- Reach on Conflux Bounty Hack – Championship (Solo)
- Huawei College Blockchain Competition – Distinction Award
- Huawei Cloud Cup National AI Contest – Winning Prize
- Conflux Beidou Entrepreneurship Camp – 3rd Prize
- Unihack Conflux – Enterprise Award
- Conflux Practitioner Program – Practitioner Medal
- PaddlePaddle MarTech Challenge – 1st Place (Solo)
- Deloitte Digital Difference Camp – Top 10

CERTIFICATIONS

- AWS Educate Introduction to Cloud 101 – Amazon Web Services
- Junior (Level 2) Blockchain Application/Infrastructure Architect – Chinese MIIT
- Solidity Bootcamp Certificate – Encode Club
