

A purple fingerprint graphic composed of a grid of small plus signs, located on the left side of the slide, partially behind the text.

**BRING THE
WEB 3.0 FUTURE TO
EVERYONE'S FINGERTIP**

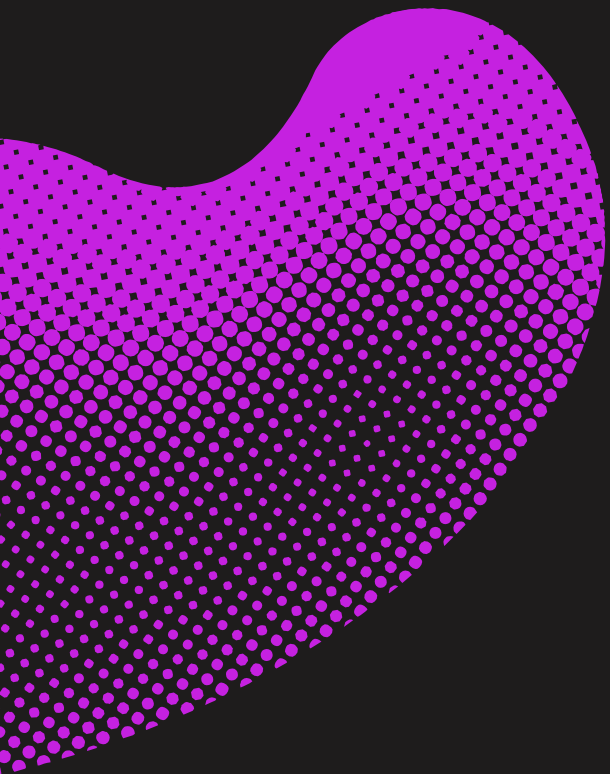

Our Vision

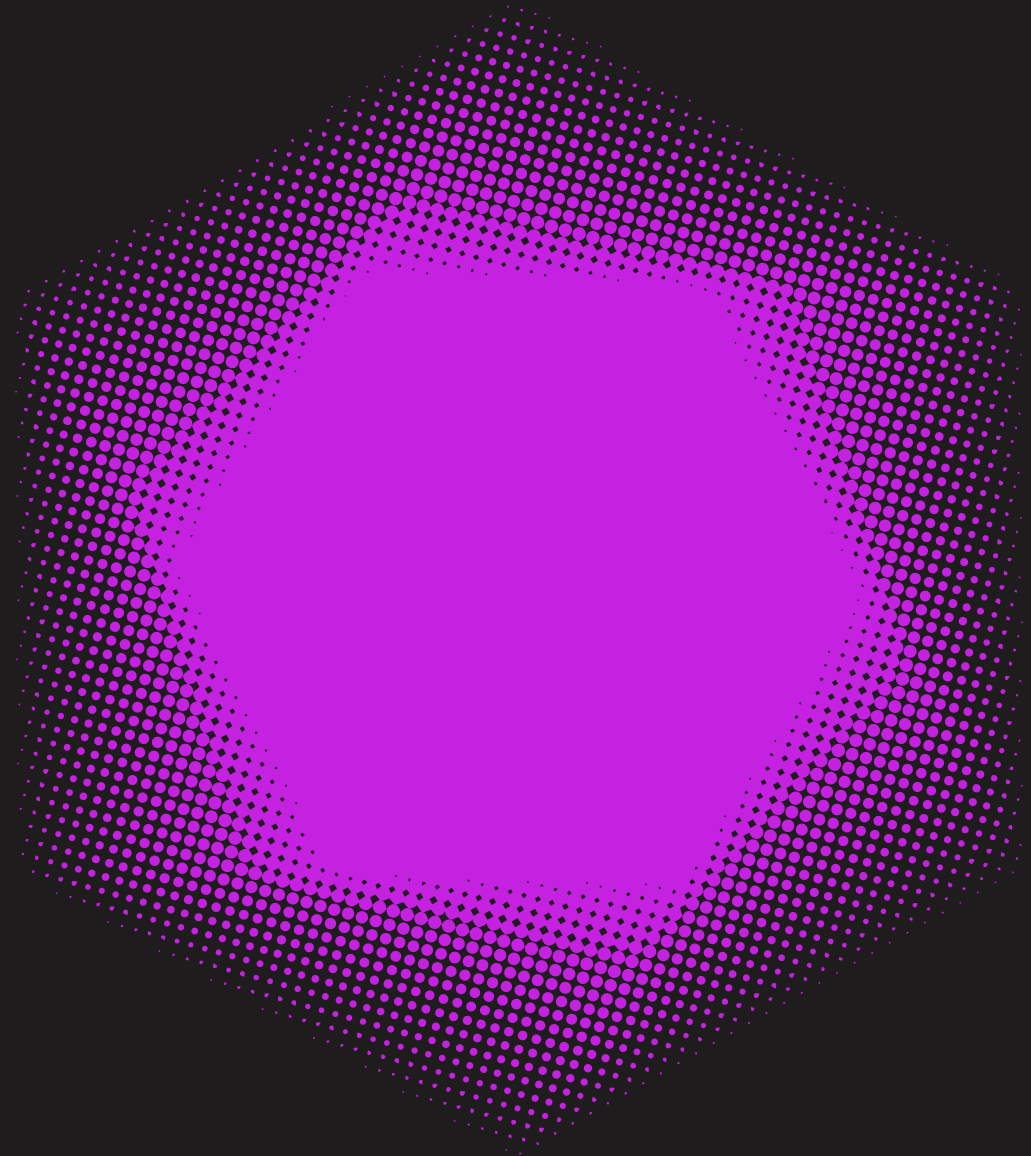

To be the 1st Web 3.0 Super
App for million users

Our Mission

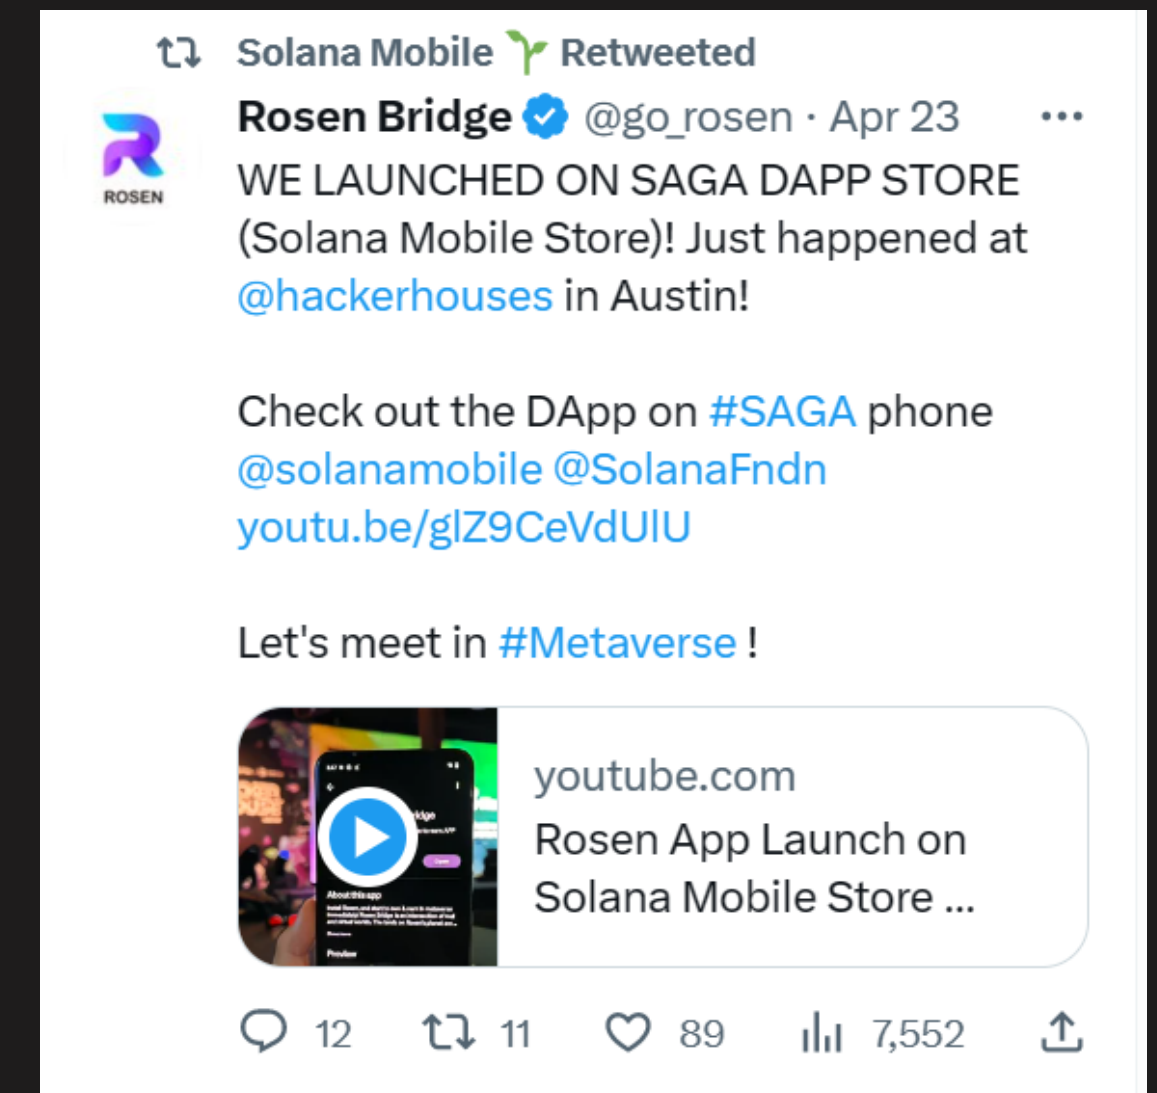

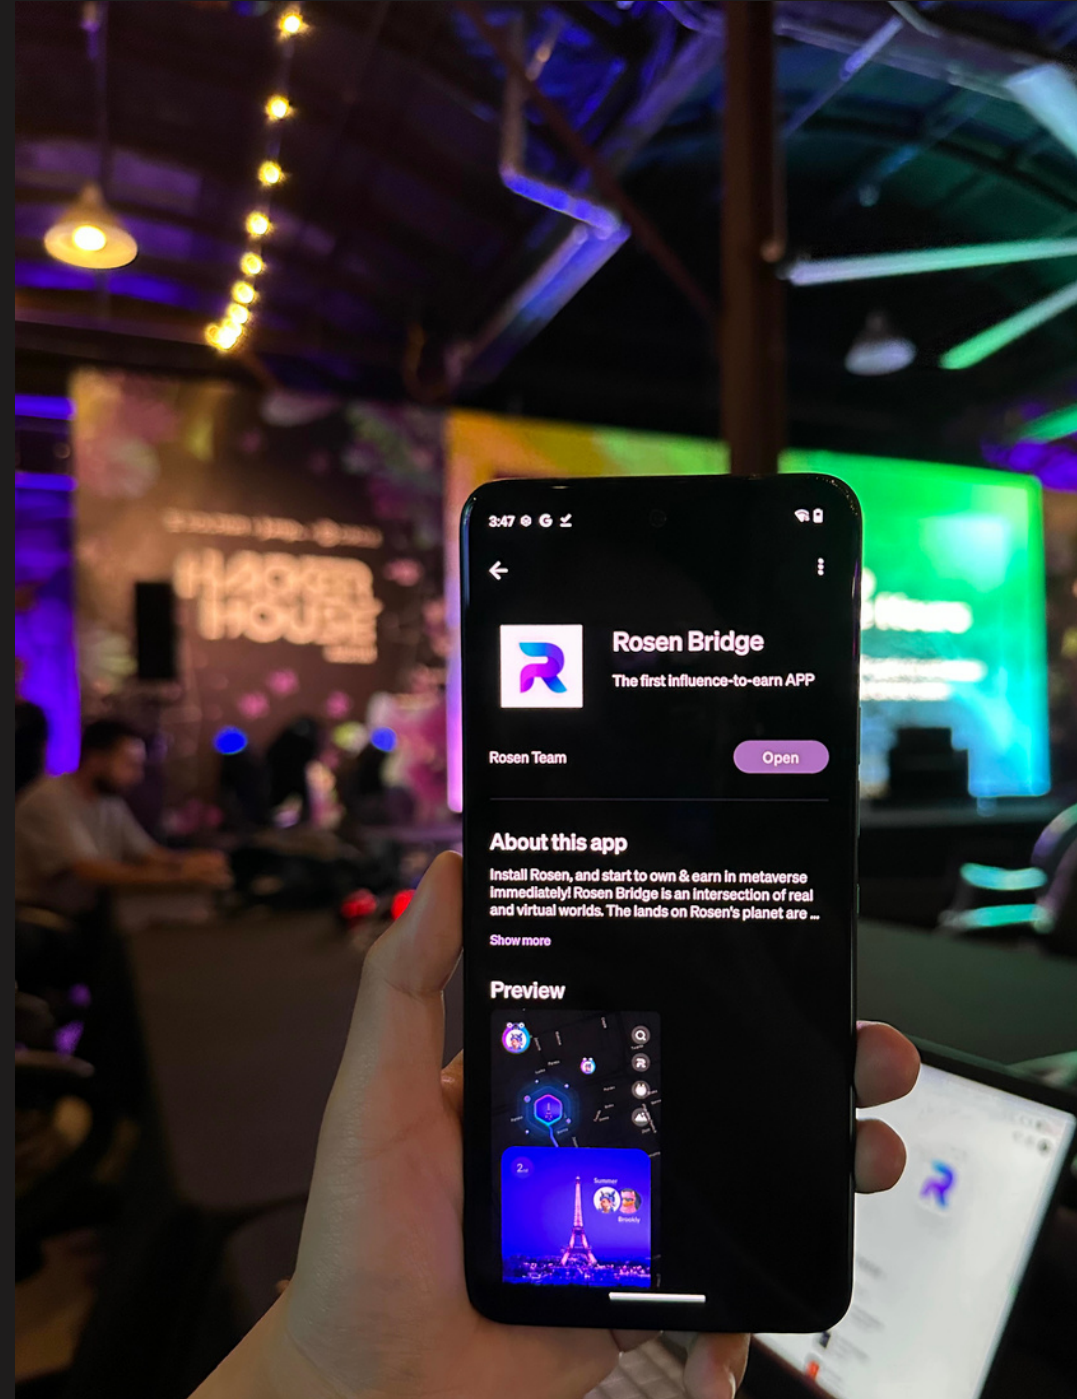

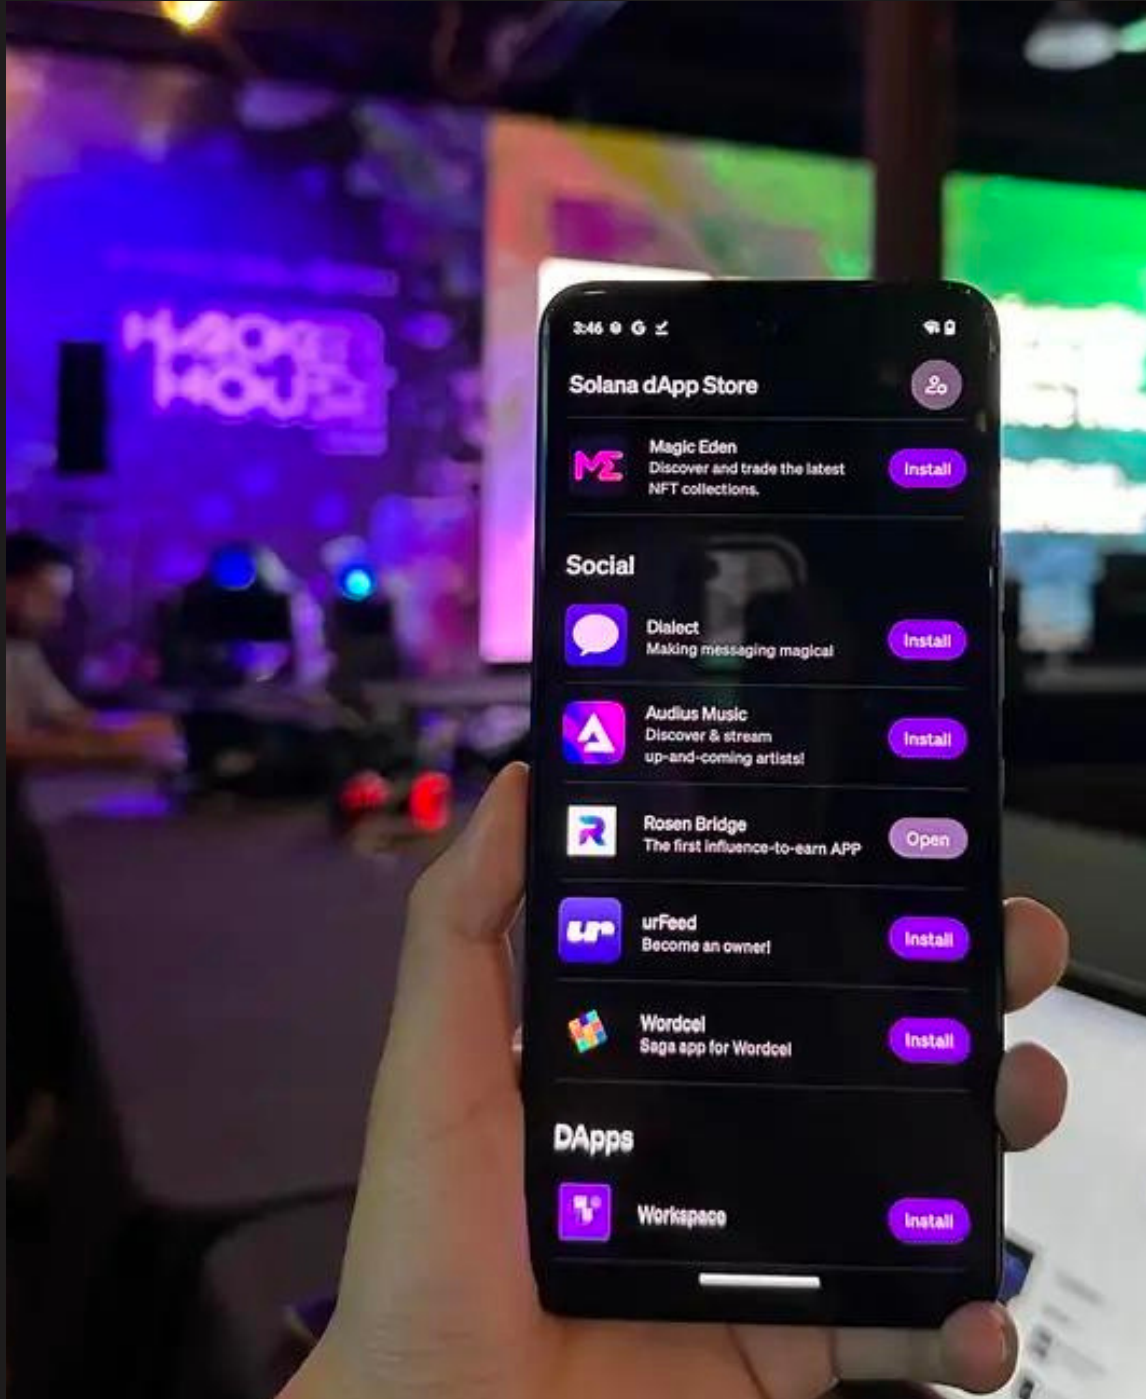

Bring the Web 3.0 future to
everyone's fingertip

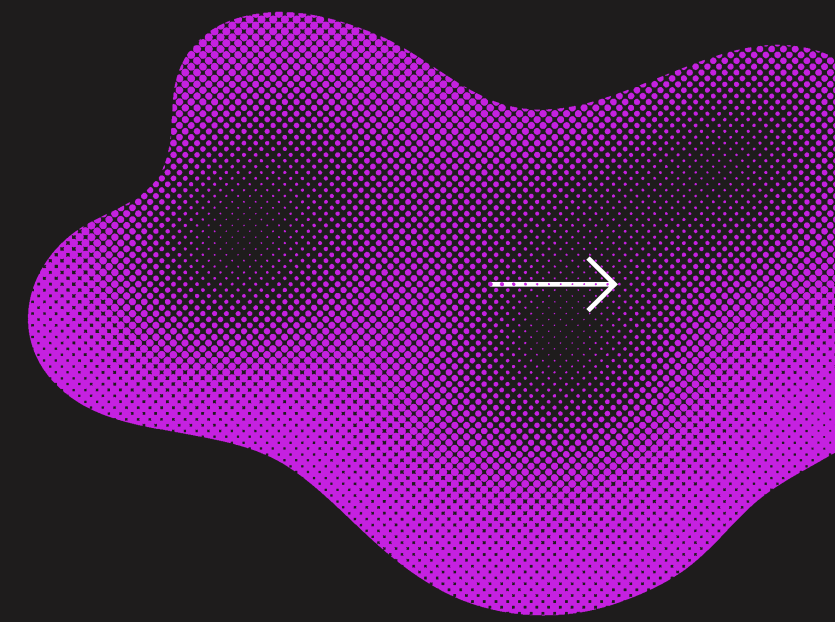

**What have we
done so far?**

Our beta is 1 of the first 17 Dapps launched on Saga Dapp store

Our beta was adopted by

- 338 Web2 influencers whose followers >148.9M
- 7 events 20k+ attendees
- 12 communities

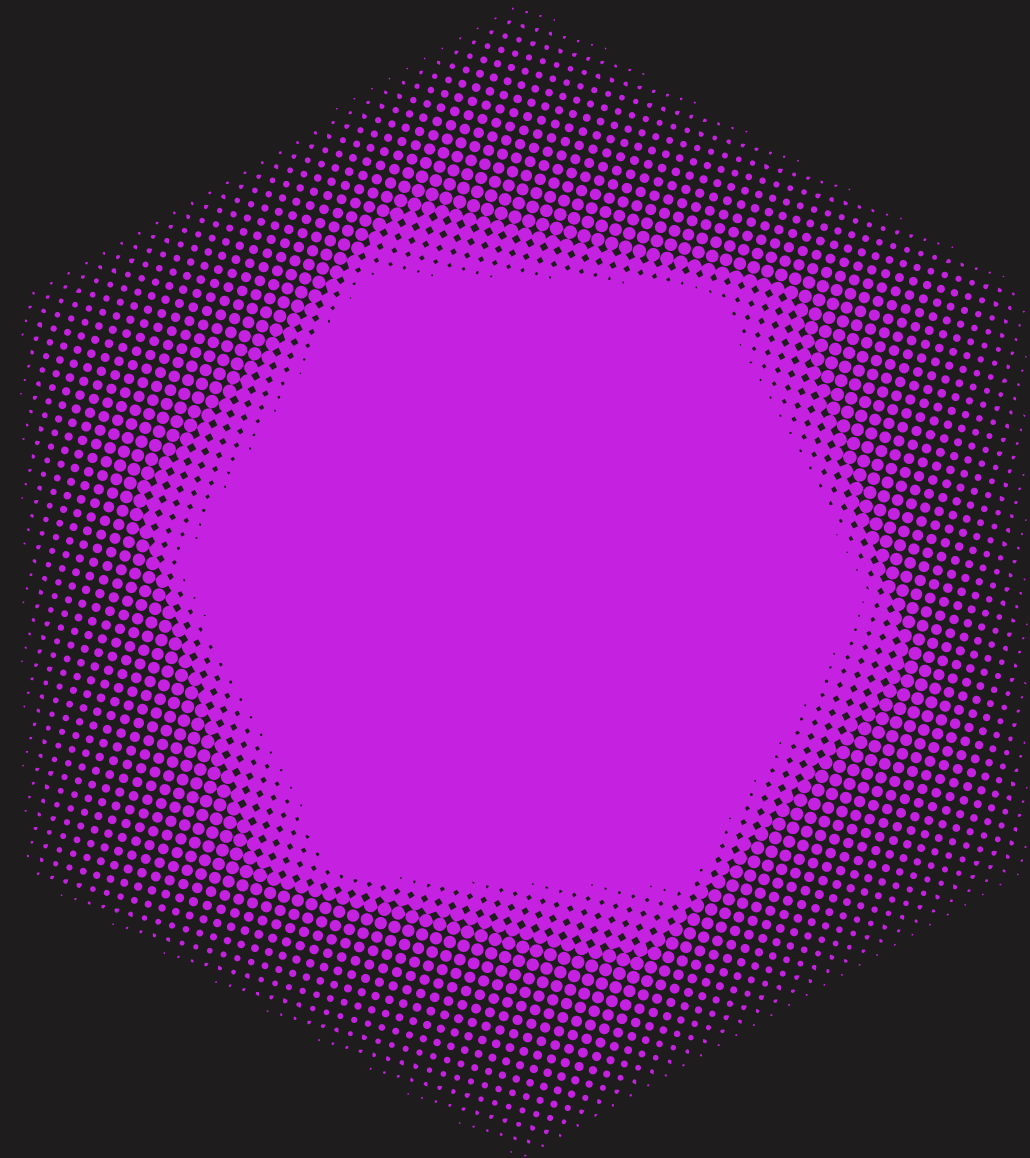

The Rising Star 2023

selected by  BNB CHAIN < CyberConnect

Comparison					
Projects name		Valuation (market cap)	MAU	Compound monthly growth rate	
Sandbox		\$ 4B	2k	-	↓
Upland		-	3k	-25.1%	↓
StepN		\$ 2.5B	17k	-44.6%	↓
Rosen		-	1846	270%	↑

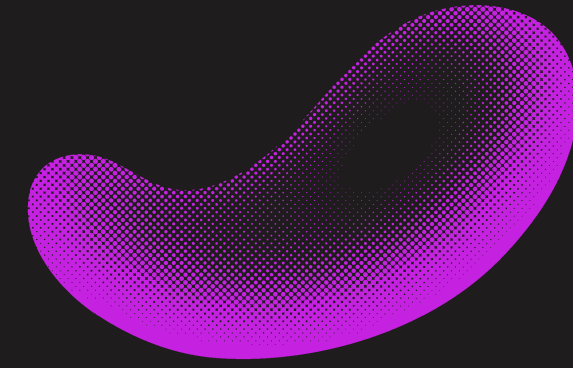

We **have not** spent a single
dollar on ads or outbound
marketing to get this traction!

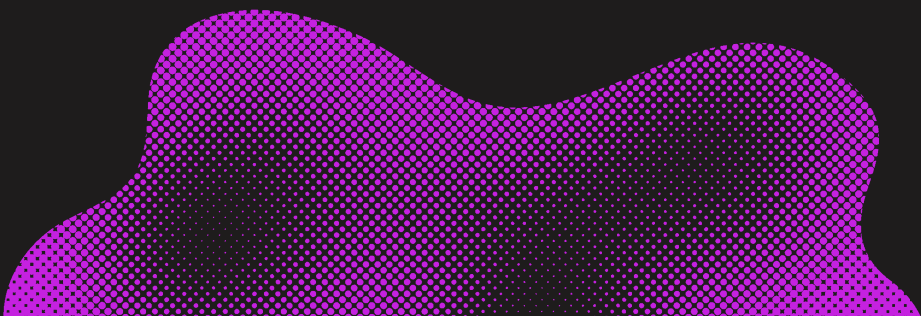

Our market performance
is way **better** than other
products.

How do we **make this**?

We solve 2 key **pain points**
at once

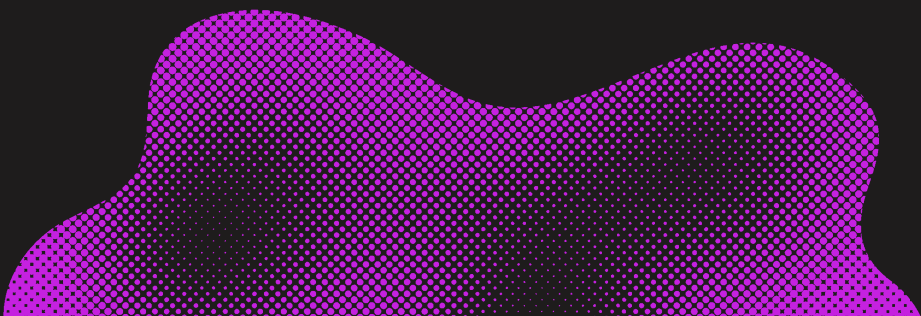

①

Current web3 products don't provide
real value to users but only crazy hype

②

The threshold for users to enter web3
is too high

Today, if you want to play a web3 App, what you'd have:

- Wallet
- Exchange
- Multi cryptos
- Be aware of every chain and its token
- Deposit the gas fee
- Avoid scam
- ...

**Current web3 Apps UX are
shutting massive users out...**

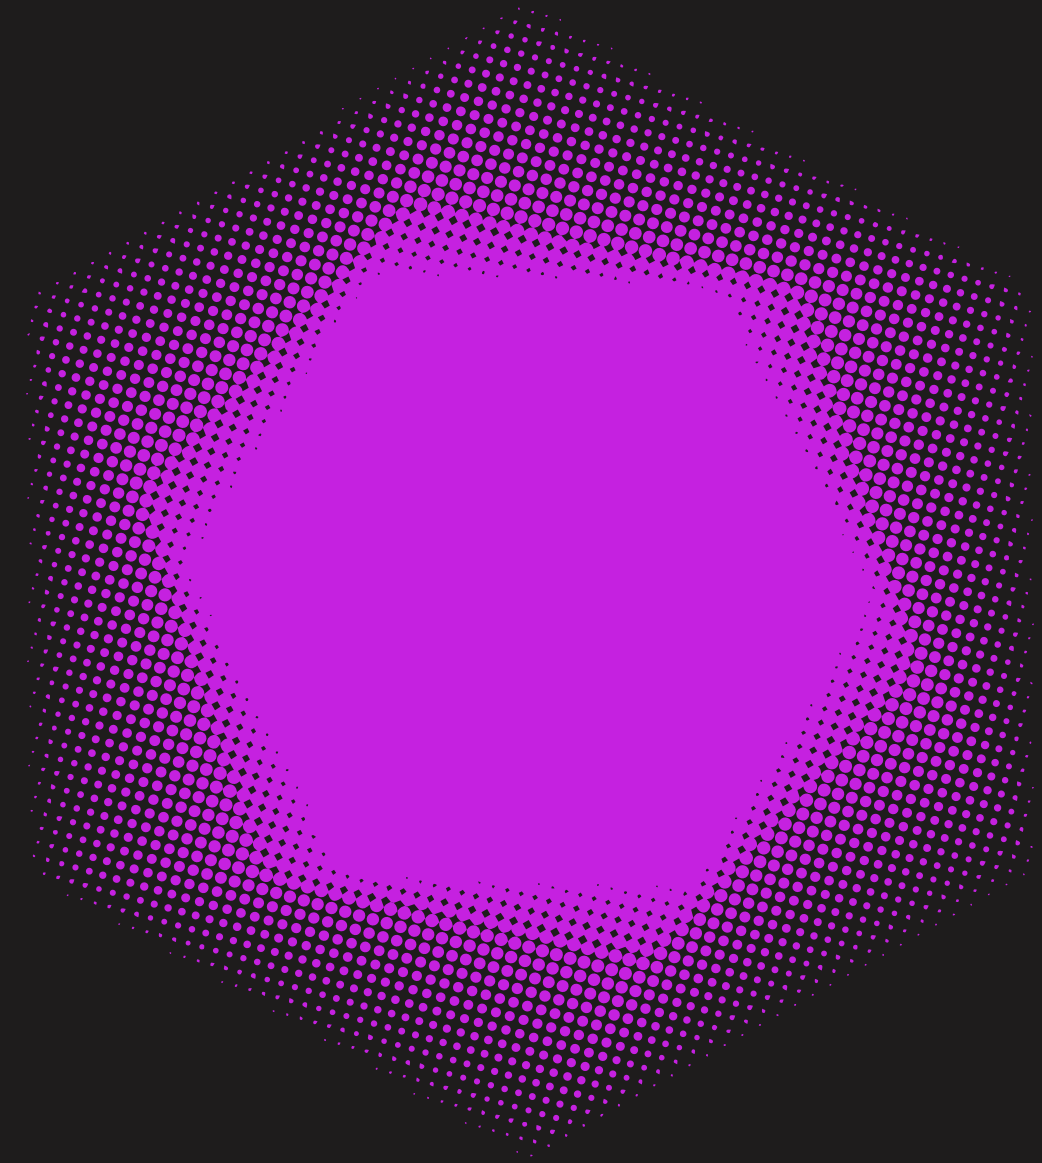

So we built Rosen

Geo-based social metaverse DApp that
seamlessly enables mass users to have
better ownership & monetization in the
digital world

USP: Web2 UX + Web3 features

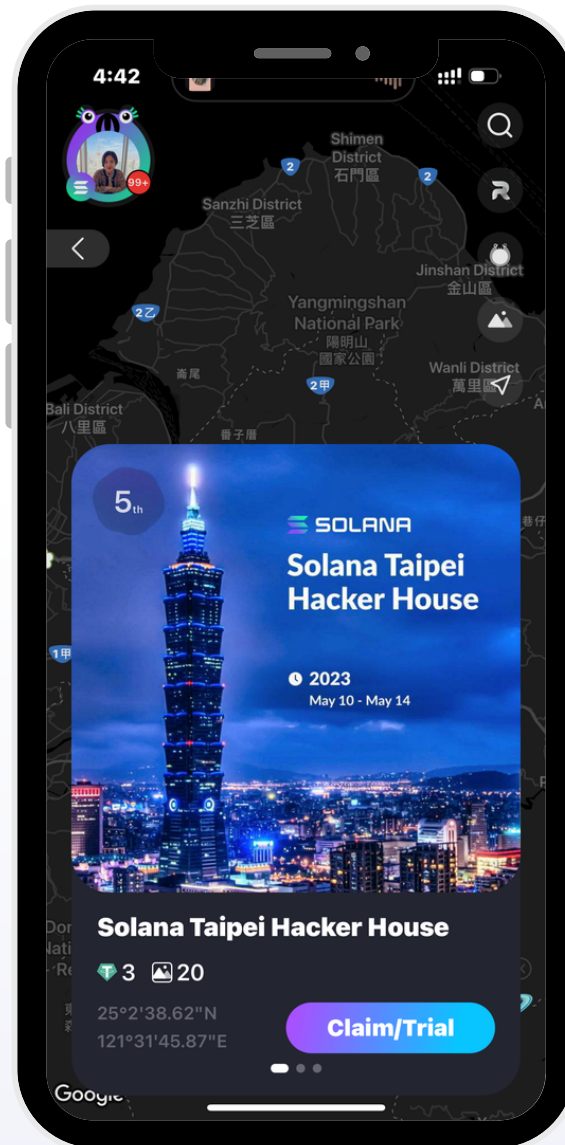

- low barrier to entry
- high quality
- real value to users
- interoperability

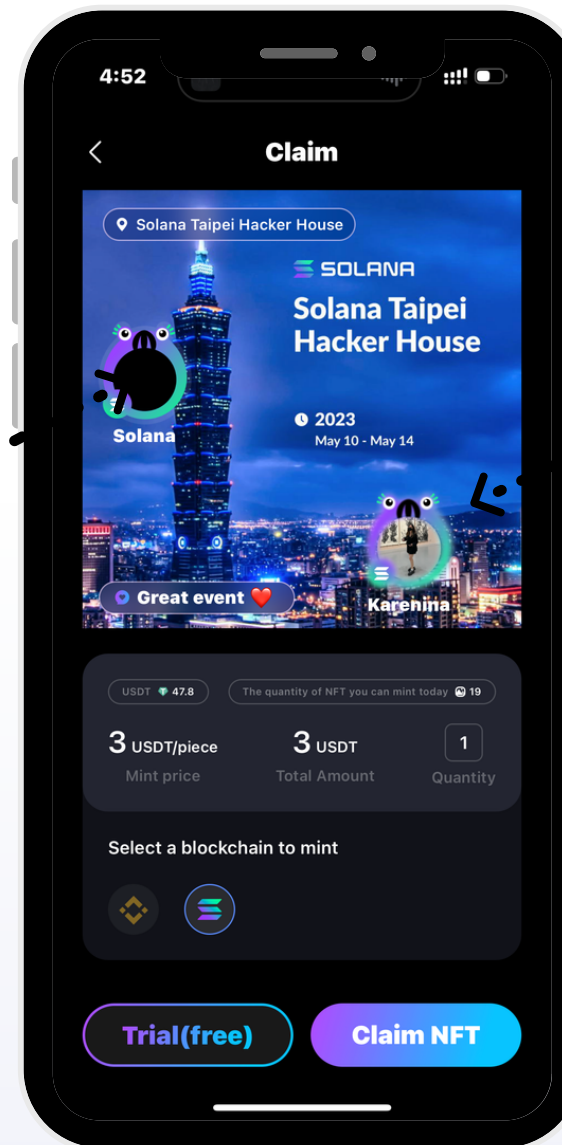

Use Case

Better social monetization for Business End

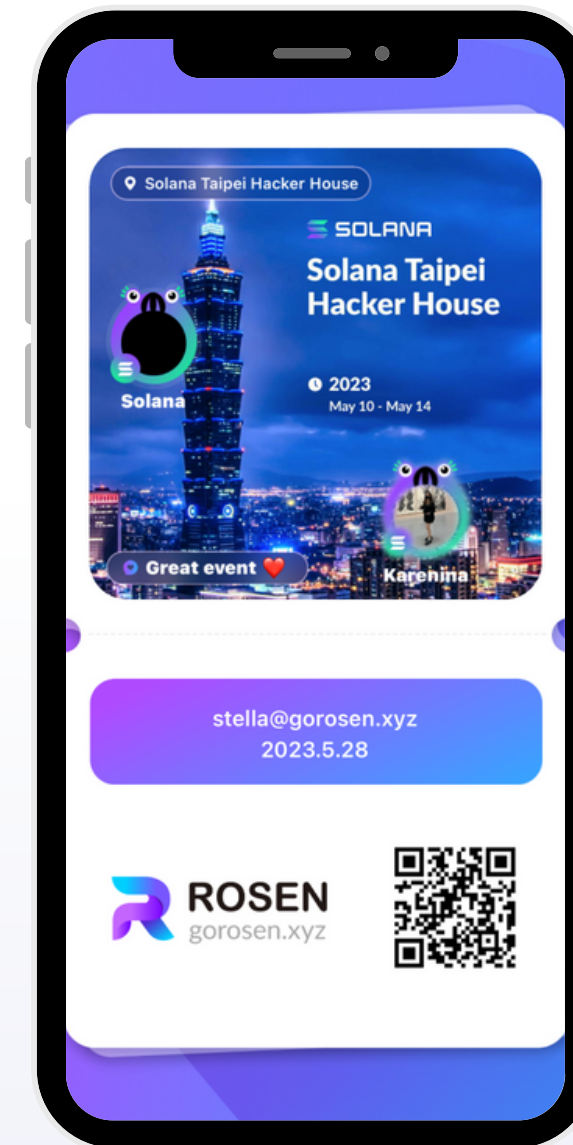

Land plot owners on Rosen planet can be any individual or organization that wishes to be donated /tipped

Recipient

Donor creates NFT on the plot to
donate or tip to the landowner

Donor

Donor gets an NFT (digital collection) as a proof of donation

Better social monetization for Influencer End

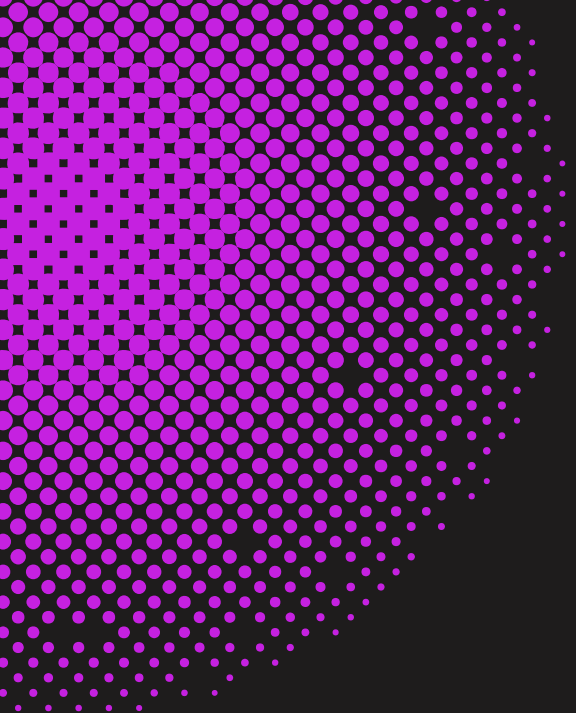

Edison is a **disabled micro influencer** on IG who is living by creating videos and getting tips/donations from his audiences on social media.

I like Rosen and believe it will be the future because it's more transparent and fairer.

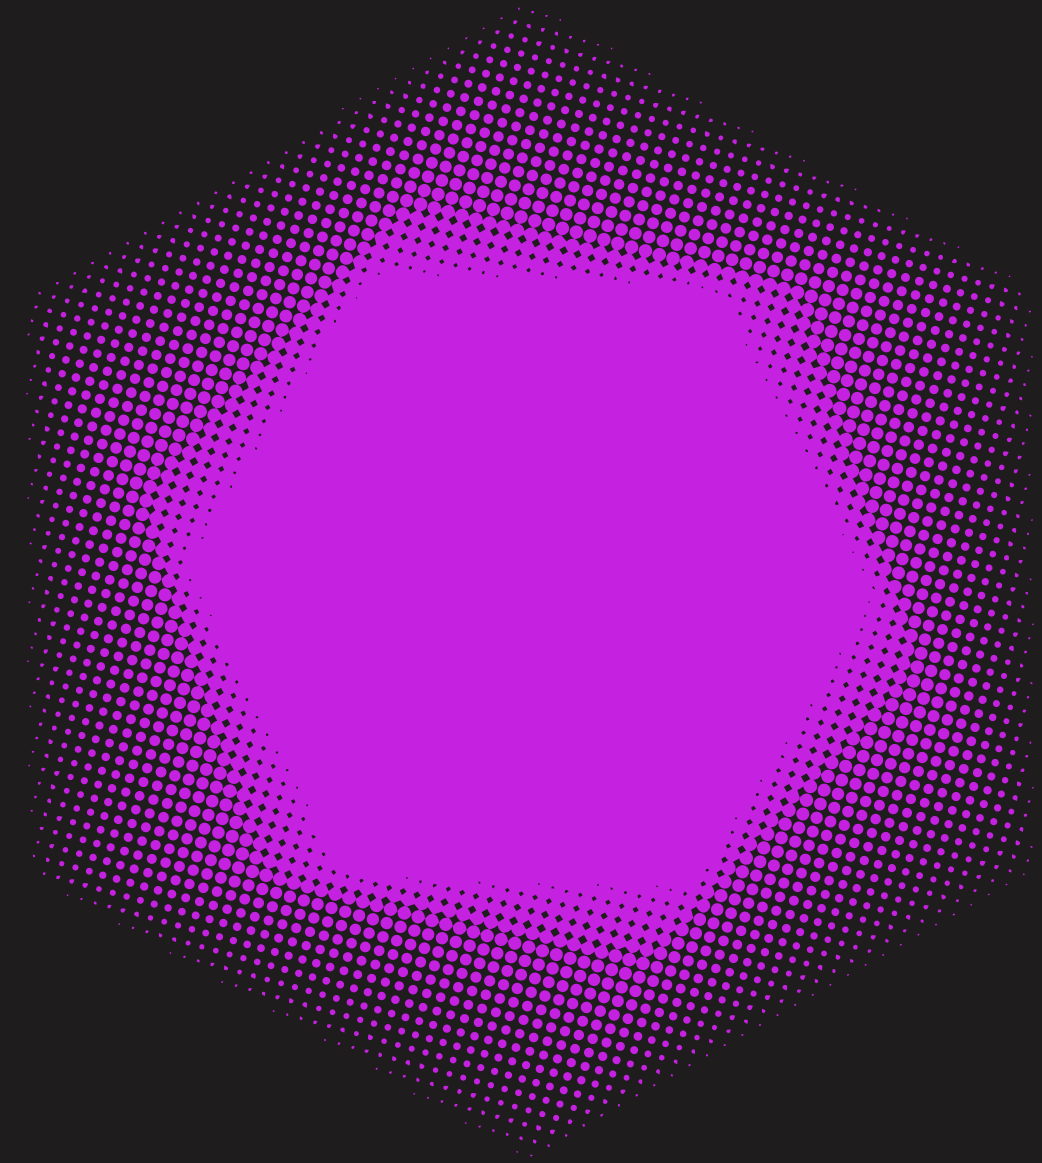

Robots may follow you but won't tip on you. We don't need fake followers but monetize better from our creation.

I am a micro-influencer in Ecuador. I earned 120 USD in 3 days through Rosen. More than my daily job!

We hope to help more people and
organizations like Edison to get
financial support fairly & easily through
their social influence in the real world

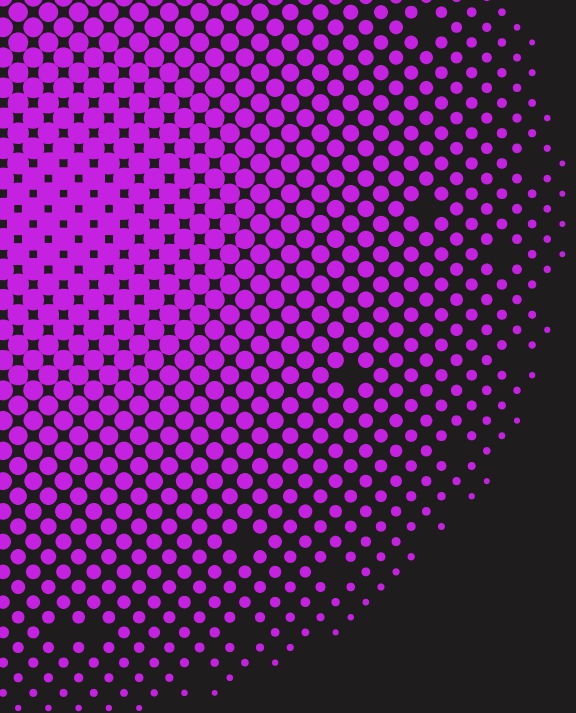

To the Future

Next plan

- 
- Iterate the current beta, add the most urgent new features
 - Expand our ongoing market testing in Asia and America
 - Prepare for going social viral in the next stage (simultaneously carry out at the product, market, and financing levels)

To be the next-generation
Web3.0 Super App with millions
of users & become a truly
valuable web3.0 social infra.
