EDUCATION

The University of Edinburgh

Master of Arts in Cognitive Science (Bachelor Degree) Sep 2020 – Jun 2024

- GPA: 3.7
- Coursework: Cognitive Science, Reasoning and Agents, Algorithms and Data Structures, Software Engineering, Data Analysis in R, Information Content Security, Information Systems Security, Computer Network, etc.
- Auxiliary education:
 - Computational Neuroscience Summer school held by Neuromatch Academy
 - Solidity BootCamp held by Encode Club

Fudan University

Exchange – Major in Computer Science and Technology Sep 2022 – Jun 2023

RELEVANT EXPERIENCE

HashPunk

Project & Product Manager Intern Sep 2021 – Aug 2022

HashPunk is a startup in blockchain technology founded by the previous product director of Conflux Network to deploy applications on multiple public chains such as Ethereum and KuCoin.

- Conduct research about industries and projects such as Gamefi, derivatives, NFT data aggregator, Defi aggregator, DID, etc., and output reports or summaries.
- Write PRD and make the prototype/pitch deck/whitepaper of several GameFi-related projects.
- The Gamefi project I was in charge of has been invested by KuCoin Ventures, Chain Capital, K300 Ventures, etc.

1CIRCLE, ALGO

Software Engineer Jan 2022 – Present

1CIRCLE is the official Chinese community for the Algorand blockchain and it holds several NFT projects.

- Use Reach to develop the smart contracts of a POAP-like application with which people could interact to collect the badge.
- Manage the NFT issuing of several NFT projects using different NFT standards such as ARC-69; for more utility and playability, implement NFTs whose metadata can be modified when interacting with other NFTs using ARC-19.
- Design and prototype a Gamefi project based on 3 Tiles, adding more utilities to the utility token of an NFT project.

Rosen Bridge

Founding Engineer Aug 2022 – Present

Rosen Bridge is a social DAPP that implements NFT/metaverse as a service, it is founded by the program director from **500 Global**, and I was selected from **over 100 candidates** to work with them.

- Use React Native to develop the front end of the cross-platform application (IOS, Android, and Web)
- Integrates multi-chain connection to the APP (Solana, BSC, etc.) and helps backend engineers to develop the smart contract and integrate services provided on blockchain nodes.
- Write the light paper as well as other docs, pitch on many hackathons and live sessions such as DoraHacks BNB Grant, MoleDAO demo day, Encode Hackathon, etc., and reach out to investors.

Quadratic Acceleration Quantum

Associate OCT 2022 – Present

Quadratic Acceleration Quantum (QAQ) was co-founded by WEIKEZHI and CyberLabs. It is a technology start-up

accelerator focused on empowering Chinese entrepreneurs.

- Research projects, industries, and policies related to Defi, Tokenomics, Web3 Regulation and investment, etc and make the deck for educational propose.
- Reach out to projects and filter potential ones, at the same time, reach out to investors and facilitate investment in those projects.

LEADERSHIP

The University of Edinburgh LambdaSoc Society

Founder MAY 2021 – MAY 2022

- Organize weekly sharing sessions, Hold various activities such as coding sessions, study groups, etc.
- Lead and arrange members for AI and blockchain competitions.

Lambda Web3 Community

Founder APR 2022 – Present

- Lead the operational team to build a media matrix on Xiaohongshu, Zhihu, Twitter, etc and we have around **4000** followers on our social media. The community currently has more than **1000** members and the number is still increasing organically.
- Lead community projects such as the whitepaper, DAO research, DAO building, etc.
- Develop and negotiate with partners such as Encode club, Algorand student club, etc.

RELEVANT AWARDS AND CERTIFICATES

- **First place** in Cosmos Chinese Developer Training Phase 1 Hackathon (With Team – as frontend developer)
- **Championship** of 2022 Algorand Green House Hack 2 ARC-0020 Smart Contract challenge (Solo)
- **Championship** of 2022 Algorand Green House Hack 2 Similarity Service in Marketplace for NFT Challenge (Solo)
- **Championship** of 2022 Algorand Green House Hack 1 SoulBound NFT Challenge (Solo)
- **Third prize** in the 2022 LianFang Cup Blockchain Digital Economy Business Analysis Competition (With Team – as team leader)
- **Second prize** in the Yangtze River Delta Area Data Open-Innovation-Application Competition Financial Security Track (With Team – as team leader)
- **Early Promising Mole prize** in MoleHack: NFT2.0 (Solo)
- **Bronze Mole prize (Third place)** in MoleHack: NFT2.0 (With Team – as team leader)
- **Third prize** in the 2021 Conflux Beidou University Student Entrepreneurship Camp (With Team – as team leader)
- **Championship** of 2021 Reach on Conflux Bounty Hack (Solo)
- **Enterprise Award** of the 2021 Unihack Conflux (With Team – As DAPP developer)
- **Distinction Award** of the 2021 Huawei College Blockchain Competition (With Team – As team leader)
- **The winning prize** of the 2021 Huawei Cloud Cup National AI contest (With Team – As AI developer)
- **First place** in Paddlepaddle Regular Season: MarTech Challenge Click anti-fraud prediction contest (Solo)
- **Top 10** in 2021 Deloitte Digital Difference Camp (With Team - As software tester)
- Junior (Level 2) **Blockchain Architect** and Junior (Level 2) **Blockchain Operation and Maintenance Engineer** (Issued by the Chinese Ministry of Industry and Information Technology)

SKILLS

- Mandarin (Native), English (Business)
- Familiar with Python, Java, Reach, Solidity, and Javascript;
- Have basic knowledge and practice in Haskell, Go, Matlab, CSS, HTML, R, etc.
- Familiar with tools and frameworks in AI, frontend development, quantitative trading, and prototype design such as Pytorch, Tensorflow, Paddlepaddle, cctx, React, React Native, Axure, and Modao (Familiar)
- Familiar with industry and project research and have basic knowledge and practice in venture capital investment.
